VS-PeCo-Lite

- VS-PeCo RAM is a video system based on a TCP network
- Transmission TCP/IP up to 25 images/second
- Multi-use connection through Internet Explorer
- Extraction of counter data through traffic flow analysis of digital images
- Easy to use and install

VS102RAM-PECO2

WIRELESS SINGLE MICRO CAMERA

This is the simplest, most discrete surveillance system for use within shops, offices etc, and is easily connected to a monitor (or computer through the use of an electronic card).

It can also be used at home in order to monitor children or elderly people by connecting the receiver to a television through a Scart plug.
