

Labels

Ketec offers a variety of labels in the following sizes:

- 1.5" x 1.5" (4 x 4 cm)
- 2" x 2" (5 x 5 cm)

These labels are available in several different frequencies including 8.2 MHz and 9.5 MHz. Their use depends upon the application.

Different printing options are also available.

Deactivators

the Ketec Deactivators are designed to deactivate all 8.2 MHz disposable labels. The operator does not have to find or locate the disposable label on the item in order for it to be deactivated. An audible tone alerts the operator of labels that will not deactivate. The deactivation unit is placed next to the point-of-sale equipment for quick and easy checkout.

Benefits of Ketec Deactivators:

- Non-contact deactivation
- Reduces EAS related labor
- integrates smoothly with checkout procedures
- Doubles as a point-of-sale detector
